About Me

I am an experienced administrative professional with a background in government service, where I have supported different clientele, coordinated requests and appointments, managed documents and records, and handled procurement and inventory processes. I am organized, detail-oriented, customer-service oriented, and comfortable coordinating information and follow-ups across different people and tasks. I am now looking to bring these transferable skills into a Client Coordinator role and contribute dependable, responsive support to clients and the team.

What I Bring

Strength	How I Apply It
Organization	Keep requests, records, schedules, and follow-ups structured.
Communication	Provide clear, professional updates and route information to the right person.
Attention to Detail	Maintain accurate documentation and tracking records.
Coordination	Connect people, information, supplies, and next steps to keep work moving.
Reliability	Follow through on assigned responsibilities and maintain accountability.

- Supported scheduling, transportation arrangements, telephone routing, and visitor assistance.

Sample Work

The following are portfolio samples created to demonstrate how I would approach common client-coordination tasks. They are mock examples, not representations of work completed for a specific client.

01 | Client Email & Follow-Up

A professional response for acknowledging a client request, confirming the next action, and setting expectations.

Subject: Update on Your Request

Hi [Client Name],

Thank you for reaching out. I've received your request and will coordinate the next steps with the appropriate team.

I'll review the details, confirm the information needed, and follow up with you once I have an update. If there is anything else you would like us to consider, please feel free to let me know.

Thank you for your patience.

Best regards,
Iris Jean P. Oray
Client Coordinator

02 | Appointment & Follow-Up Tracker

A simple tracker designed to keep client appointments, status, next action, and follow-up dates organized.

CLIENT COORDINATION TRACKER

Client	Request	Date/Time	Status	Next Action	Follow-Up
Client A	Initial consultation	Sept. 8, 10:00 AM	Confirmed	Send reminder	Sept. 7
Client B	Service inquiry	Sept. 8, 2:00 PM	Pending	Confirm availability	Sept. 8
Client C	Follow-up call	Sept. 9, 11:00 AM	Completed	Send summary	Sept. 9

Workflow: Receive request → Record details → Confirm/coordinate → Update status → Follow up → Close the task.

03 | Client Call / Inquiry Notes

A concise format for capturing important details after a client call so that the next person can quickly understand the situation.

CLIENT CALL NOTES

Client: [Client Name]
Date/Time: [Date and Time]
Reason for Call: [Brief reason]
Key Details: [Important information shared by the client]
Action Taken: [What was done during/after the call]
Next Step: [What needs to happen next]
Assigned To: [Person/Team]
Follow-Up Date: [Date]
Status: Open / Pending / Completed

04 | Client Coordination Workflow

A practical workflow demonstrating how I would keep a client request organized from first contact through completion.

1. LISTEN – Understand the client's request and concerns.
2. RECORD – Capture accurate details and deadlines.
3. COORDINATE – Contact the appropriate person/team and arrange the next step.
4. COMMUNICATE – Keep the client informed clearly and professionally.
5. FOLLOW UP – Check progress and make sure commitments are completed.
6. CLOSE – Confirm resolution and update the record.

My Client Coordination Approach

LISTEN → RECORD → COORDINATE → COMMUNICATE → FOLLOW
UP → CLOSE

I believe effective client coordination is more than answering questions. It means understanding what the client needs, keeping accurate information, coordinating the right next step, communicating clearly, and following through until the request is completed.

Why Me?

My administrative background has trained me to work with processes, documentation, requests, deadlines, and different stakeholders. I bring a dependable work ethic, strong organizational habits, customer-service orientation, and a willingness to learn new systems and workflows.
